Jukebox Jockey Home is a full-featured and simple media player whose purpose is to help you play video, audio and karaoke files. You can organize your media, play songs and videos as you like, sync the tracks with your phone and bring songs to a great experience with your party. This jukebox tool comes with support for a touch screen and can be used at parties or other events. User interface You are welcomed by a colorful GUI that provides access to a well-structured suite of features. You can easily switch between music, karaoke and video view mode. Although the GUI provides a clean feature lineup, there are a lot of tools that you can experiment with, so you may need to spend some extra time in order to understand how it works. In addition, you can access a help manual in case you want to find out more the utility's features. The program lets you perform searches and integrates a built-in keyboard for helping you carry out this task. In addition, you can view information about artists, album wall, compilations and playlists, and enable the full screen mode. Playback capabilities Jukebox Jockey Home offers you the option to seek for a position in the streams, play, pause or stop the current selection, shuffle items, go to the next item in the list, create a request list, tag tracks, as well as work with a playlist editor where you can arrange files in the preferred order and delete items. Configuration settings The application is able to add media files by automatically scanning the user-defined directories and helps you show cover art in list, activate the loop mode in order to start over when the last track is played, play files in a random order, and skip tracks that have been played. You can change the looks of the utility by selecting between different skins, alter the background image with a custom one from your computer, automatically start playing on startup, use the internal player or Winamp, apply fade in and out effects, and enable silence detection for gapless playback. Bottom line All things considered, Jukebox Jockey Home proves to be a reliable digital jukebox that hides under the hood a set of handy playback tools. If you are looking for advanced features, you can have a look at Jukebox Jockey Platinum which comes with support for host users that may change volume and player controls, exporting options of your scanned media to CSV files, custom layout on

KEYMACRO is a software key and mouse recorder. It is able to record any hotkey combination in your system and play it back when the program is started. Also, you are able to create and play your own keyboard macros. Keyboard macros are especially useful for power users and people who require frequently repeated keyboard events such as Word processing, and video games. A simple interface allows you to record any hotkey combination, create your own macros and to play them back. Mozilla Application Description: Mozilla is a web browser that is considered to be the best web browser for programmers.
